We care deeply about your experience!

After you return home, you may receive a survey to complete in the mail. We ask that you complete and return the survey. Your input helps us to recognize those who provide exceptional care and areas in which we can improve.

We appreciate your assistance with providing us your valuable feedback.

Welcome,

We believe that healthcare should be about you and your family. We strive to deliver healthcare compassionately and to act with absolute integrity. Our team of professionals will work closely with you and your family to provide an ideal patient experience. We want to help you heal quickly and get back to the life you enjoy.

We want to put your mind at ease by including you as an active participant in your care. Our goal is to involve you in every aspect of your care. We will rely on you to give us accurate information regarding your medical history, home medications and pain level and to voice any concerns you may have during your stay. *It is important to remember that you play a significant role in your recovery.*

Our goal is to make you feel comfortable and secure throughout this process. Please ask any questions or share any concerns with the staff so that we can make this experience the best for you. We are committed to you, our patient, and want you to receive quality care during your visit with us. Thank you for allowing us to care for you. It is our privilege to be your healthcare provider.

The information in this guide will help you prepare for surgery and to recover following surgery. Please read through this material several times. Identify any topics you want to discuss with your physician or with the hospital staff. Write down any questions you have, and be sure to ask your nurse and physician. We are here to help you through this experience and to meet your individual needs.

Sincerely,

Your Care Team

Baylor Scott & White Medical Center – Frisco

From your spine team

We're pleased that you are considering us for your spine care. Our mission is to provide the opportunity to every individual within Frisco and the surrounding communities the highest standard of healthcare services, designed with excellence, delivered with dignity and demonstrated with respect to those we serve. With that in mind, we are excited to walk alongside you during this process.

As a patient undergoing spinal surgery with us, we want your experience to be as stress-free as possible. This spine surgery guide is designed to offer additional information regarding your preparation before surgery, the surgery itself and your road to recovery. Our hope is to help reduce your anxiety around your hospital stay by helping you understand what to expect and when to expect it.

As a patient, you will play an active role during your hospitalization. Our goal is to involve you in every aspect of your care. We will rely on you to give us accurate information regarding your medical history, home medications and pain level and voice any concerns you may have during your stay with us. It is important to remember that you are in charge of your own recovery.

Thank you for your dedication to prepare for your surgery. We look forward to meeting you.

About our hospital

Complimentary valet service

Patients and visitors may use our complimentary valet services at the main entrance of the hospital. Valet services are available Monday - Friday from 6:00 AM - 6:00 PM.

Guest information

Our hospital's main entrance is open seven days a week, 24 hours per day. We do not have set visiting hours, but we ask that your family and friends be sensitive to your recovery needs. Children under 12 must be accompanied by an adult.

Inpatient rooms

All rooms are private and furnished with a couch that folds into a bed if an adult family member would like to stay overnight.

Dining

During your stay with us, you will order your food through our Dine on Demand service. A room ambassador will take your order, or you may place an order at any time by dialing extension **5757** on your hospital room phone. Each patient meal also comes with a complimentary guest meal if a family member would like to eat with you.

Tobacco-free campus

Our campus is tobacco-free with no designated smoking areas. Our goal is to promote a healthy lifestyle for our patients, staff and families.

Comments and compliments

We appreciate your comments. Our employees believe your comments allow us the opportunity to grow. You will receive a survey about your hospital stay after you return home. Please fill this survey out and return it as indicated. We value your input.

Complaints

- We pride ourselves on the customer service we provide for our patients and their families. If at any time you are not satisfied with the care you received, room environment, etc., please let us know immediately.
- You may file a complaint by contacting any of the following personnel:
 - o Post Surgical Unit Manager..... **ext. 5188**
 - o Patient Advocate
 - o Manager - Center of Excellence
 - o Spine Coordinator
 - o Chief Nursing Officer.....

Compliments

- Our nurses and hospital staff strive to make your stay a pleasant experience. If you feel someone has gone above and beyond to care for you or your family member, please take the time to fill out an EXCEL card. EXCEL cards are located in the front lobby outside the cafeteria, the nurses stations or may be obtained by asking one of our staff members.
- Pursuit of Excellence cards are read by senior administration, the director, department manager and the employee.

Comments and compliments

Your care team

Your care team

The following team of healthcare providers is dedicated to helping you have a successful outcome with your surgery:

- Your surgeon and physician assistant will direct your surgical care and will check on you daily to monitor your progress.
- Your internal medicine physician or nurse practitioner will direct your medical care and will check on you daily to monitor your progress.
- Your anesthesiologist or certified registered nurse anesthetist (CRNA) will provide your anesthesia throughout your operation.
- Your circulating nurse and surgical scrub tech will assist your surgeon during your operation.
- Your registered nurses (RN) will assess your progress, assist with any needs, give you medication, and provide education before your surgery, in the recovery room and on the surgical floor.
- Your patient care technicians (PCT) will assist with needs, help you walk to the bathroom and take your vital signs.
- Your respiratory therapists will monitor your breathing and oxygenation and provide education/assistance as needed.
- Your physical therapists will evaluate your needs and help you learn how to safely walk around after your surgery.
- If requested by your surgeon, your social worker will evaluate your discharge needs. He or she can assist you in ordering equipment, discharge planning and follow-up needs.
- Your room ambassador will visit you around mealtimes and take orders for your meals for both you and your support person.

Keeping you safe

Keeping you safe

- Keeping you safe is our top priority. We will ask you numerous times throughout your hospital stay to state your name and date of birth and compare it to your identification armband. This ensures that we are providing the right treatment, medication or test during your stay with us.
- We want to ensure that we perform the correct procedure on the correct patient at the correct site every time. You will play an active role in this process by verifying your surgery and surgical site with your surgeon as he or she marks your surgery site in the pre-op waiting area.
- Preventing the spread of germs is of utmost importance. Your healthcare providers will wash their hands with soap and water or use gel hand sanitizer every time they enter or exit your room. This should also be done by your family members/visitors. If you have concerns that your healthcare provider or family have not washed their hands, please voice your concerns. You will also be provided with hand sanitizing wipes that may be kept at your bedside.

Understanding your spine

Your spinal column consists of 33 bony vertebrae, separated into 5 different regions:

- Cervical (neck): 7 vertebrae.
- Thoracic (upper/middle back): 12 vertebrae.
- Lumbar (lower back): 5 vertebrae.
- Sacral (pelvic area): 5 vertebrae, fused together .
- Coccyx (tailbone): 4 vertebrae, fused together .

The function of your spinal column is to protect your spinal cord and nerve roots, give your body structure and support, and help you to bend with flexibility.

Intervertebral discs

- Between each vertebra in your spine is an intervertebral disk which cushions your bones and keeps them from rubbing together. Healthy discs effectively absorb and distribute the spinal stress you have both at rest and while you're moving.

Muscles, Tendons and Ligaments

- Spinal muscles, tendons and ligaments work together to keep the spine stable both at rest and during activity.

Disorders of the Cervical Spine

- Herniated Disk: A disk can weaken and push outward (herniate). A bulging or herniated disk can sometimes get too close to a spinal nerve. This may cause pain and affect how the nerve works.
- Degenerative Disk Disease: With age, disks may wear out and flatten which can cause them to lose flexibility, elasticity and their shock-absorbing ability. This flattening of the disk can irritate and pinch nearby nerves, sometimes causing pain, weakness or numbness

Types of Cervical Spine Surgery

- Discectomy and Fusion: This procedure removes the problem disk that is located between the vertebrae and inserts a spacer bone graft to fill the open disk space. The graft serves as a bridge between the two vertebrae to create a spinal fusion.
- Disk Replacement: This procedure removes the problem disk and a replacement disk is inserted. This new disk is anchored into the bone and, over time, bone will grow into and around the new disk to hold it firmly in place.

Preparing for surgery

Find your support person

Spine surgery is a journey, and it is important to have someone with you during this time. Your support person can be your spouse, family member, friend or relative who will help you during recovery.

Pre-certification and authorization

Many insurance companies require pre-certification or pre-authorization for surgery. Please contact your insurance company or notify them of your upcoming surgery. If pre-authorizations or pre-determinations are required by your insurance company, contact your physician's office and have them contact your insurance provider.

- Workman's compensation and some managed care plans require approval for surgery before a surgical date can be selected.
- You may log on to [BSWHealth.com/Frisco](https://www.bswhealth.com/frisco) for a current list of contracts with insurance plans along with contact phone numbers for individual departments throughout the hospital.
- If you work, remember to notify your employer and have your surgeon's office complete any FMLA or short-term disability paperwork prior to your surgery.

Pre-admission testing and appointments

To make sure you are healthy enough to tolerate your surgery well, your surgeon may require you to be seen by an internal medicine doctor prior to your surgery. At this appointment, you may have tests completed such as blood, urine or an electrocardiogram (EKG) to evaluate your heart. You will discuss your medical history with the pre-admission nurse and the internal medicine physician. The results of this appointment will let us decide if you are ready for surgery. If necessary, you may be required to see a heart or lung doctor as well. To schedule an appointment for pre-admission testing, please call [214.407.5166](tel:214.407.5166).

Home modifications

To make your home safer and more practical after your surgery, a number of simple changes can be made. Your physical therapist may have additional suggestions for you during your hospitalization.

- Remove any trip hazards around your home (rugs, cords) and move frequently used items to places you can easily reach them.
- Arrange for assistance with household chores, driving and errands.
- Arrange for help with childcare and pets.
- Purchase groceries and prepare meals in advance.
- Make sure lamps can be turned on and off easily, preferably from bed.
- Have available a high, stable chair with a firm seat cushion and armrests.

Preoperative checklists

Use these checklists to help prepare you for surgery.

Surgical checklist

- Medical clearance appointment date/time: _____
- Specialist appointment (if applicable) date/time: _____
- Call received from pre-admission nurse
- Call received from Registration
- Quit smoking. For help, call 1.800.NO.BUTTS (1.800.662.8887).
- Medical equipment received (if applicable)
- Discuss my discharge plan with my family and friends
- Surgery date/time: _____
- Arrival time: _____ AM / PM

Suggested packing checklist

Medical items:

- CPAP or BIPAP machine (if applicable)
- Home medications in the original bottles EXCLUDING:
 - Anxiety or sleep medication: Lorazepam, Alprazolam, Ambien
 - Pain medications: Oxycodone, Hydrocodone, Morphine, Tramadol, Lyrica
 - Supplements or over-the-counter medications
- Medical equipment as instructed by your surgeon

Paperwork:

- Copy of Advanced Health Directive (if applicable)
- Driver's license or photo ID
- Insurance card

Personal items:

- Loose-fitting clothes (e.g., shorts, sweats, etc.)
- Underwear and socks
- Personal toiletries
- Eyeglasses, contact lenses with case/solution (if preferred after surgery)
- Hearing aids or dentures with working batteries
- Phone charger

Do NOT bring:

- Valuables or jewelry

Arriving for surgery

- ❑ Please report to the front desk in the main lobby. When you check in at the desk, you will be asked for your insurance card and identification and will receive a pager.
- ❑ A staff member will escort you to your pre-op room. You will change into a gown, and a nurse will start your IV.
- ❑ You will meet your anesthesiologist. He or she will discuss the anesthesia with you, options available and the best anesthesia technique for your medical history.
- ❑ You will meet with your surgeon. He or she will talk with you and will answer any final questions you may have.
- ❑ Two family members may wait with you before your surgery.

During surgery

While you are in surgery, your family will wait in the front lobby with the pager. Complimentary refreshments and coffee are available in the waiting area. Surgery times vary depending on the type of surgical procedure. If at any time your family would like an update on your status, they can request that information from our team at the front desk. When your surgery is complete, the staff will escort your family to a consultation room where your surgeon will discuss your progress.

After surgery

You will wake up in the Post Anesthesia Care Unit (PACU) and typically will remain here for one to two hours. During this time, you will be closely monitored until you wake up and your heart rate, blood pressure and breathing are normal. Because this is a small area, your family will remain in the lobby area until you are transferred to your inpatient room.

In the PACU:

- You will have an IV in your arm so you can receive medication and fluid.
- You will have oxygen delivered through a tube in your nose.
- You will have a blood pressure cuff on your arm to monitor your blood pressure and a monitor on your finger to watch your oxygen levels.
- You may have a drainage tube from your surgery site to help drain away excess fluid.
- You will have tight, elastic stockings and a compression device on your legs to help prevent blood clots.
- Your nurse will frequently ask you about your pain and will manage your pain as indicated.

When you meet discharge criteria from the PACU, you will be transferred to your inpatient room. A member of the staff will notify your family and they will be escorted to your room soon after. Some procedures do not require an overnight stay. Some patients may discharge from the recovery area to home.

In your inpatient room:

When you arrive to your inpatient room, your nurse will be monitoring your vital signs (heart rate, temperature, blood pressure and breathing) frequently. You will be placed on a monitor to continuously watch your heart rate and oxygen levels. Our staff will notify your family members of your arrival to the surgical floor, and they will soon join you in your room.

Arriving for surgery

During surgery

After surgery

Your care plan

The following is an example of what to expect the first few days after your surgery.

	Day of surgery	First day after surgery	Following days
Surgical care	<ul style="list-style-type: none"> Use the incentive spirometer 10 times every hour while awake. Do 10 ankle pumps every hour while awake. 	<ul style="list-style-type: none"> Plan to sit in a chair for all meals. Use the incentive spirometer 10 times every hour while awake. Do 10 ankle pumps every hour while awake. 	
Physical therapy	<ul style="list-style-type: none"> Sit on the edge of the bed or get into a chair. Walk a short distance with physical therapy. Do not get out of bed by yourself. 	<ul style="list-style-type: none"> Participate with physical therapy. Get out of bed or up to the chair with help. Do not get out of bed by yourself. 	<ul style="list-style-type: none"> Continue exercises and slowly increase your walking distance. Practice skills needed for home.
Diet	<ul style="list-style-type: none"> When it is time to start eating, you will start with clear liquids (chicken broth, juice, Jell-O). If you are doing well, your diet may be advanced to a regular diet if instructed by your surgeon. 	If your surgeon approves, you may eat your usual diet. Drink plenty of fluids and include fresh fruits and vegetables.	
Medication	<ul style="list-style-type: none"> Begin oral pain medication. IV pain medication may be given if needed. Notify your nurse if your pain is not under control. Your home medications will be restarted as approved by your doctor and will be given to you by your nurse. 	<ul style="list-style-type: none"> Continue your home medications that are given to you by your nurse. Continue to manage your pain with oral pain pills. 	<ul style="list-style-type: none"> Continue your home medications as instructed by your doctor. Discuss your new medications with your nurse and surgeon.
Bathroom	Call your nurse when needing to get up to the bathroom.	Call your nurse when needing to get up to the bathroom.	Call your nurse when needing to get up to the bathroom.
Dressing	You have a bandage over your incision.	You will be instructed on how to care for your bandage at home.	
Drainage tube	You may have a drainage tube to drain fluid from your surgery site.	Your drainage tube may be removed today.	
Discharge planning	If ordered by your surgeon, you may meet with a social worker to discuss discharge needs.	Arrange to have someone take you home when you leave the hospital.	

Pain

It is important to realize that pain is an integral part of the surgical process. Post-surgical pain helps us to understand your limits when working with physical therapy or when you are moving or walking with your nurse. An increase in pain medication can result in decreased breathing and drowsiness. Because of this, it is important that you are not over sedated with pain medication. We will do our best to keep your pain at a tolerable level; however, it is likely that you will experience some pain after surgery. Your doctor will prescribe different types of pain medications depending on your type of surgery, medical history and pain level.

You will be asked to rate your pain level on a scale of 0 - 10 multiple times throughout your hospital stay. Please familiarize yourself with the pain scale below.

Pain scale: 0 - 10 numeric pain intensity scale

Do not hesitate to ask for pain medication at the first sign of discomfort. Asking for the medication early is better than letting the pain become more severe. If it is too soon for more medication, or if it is not safe to give more medication because of your vital signs or breathing, the nurse may change your position, turn your pillow or try other alternatives until it is safe for more medication.

Types of pain medication

The type and amount of pain medication you receive will be determined by your surgeon based on your medication history and pain level. The different methods in which we will give you pain medications are:

- Oral: After your surgery, you will be started on oral pain medication as soon as possible and will be continued throughout your hospital stay. Common pain pills include Norco (Hydrocodone) and Percocet (Oxycodone). If oral pain medicine is not controlling your pain, IV medication may be given.
- IV: The most common IV pain medications that are given after surgery are Dilaudid or Morphine.

Common side effects of pain medication include decreased respirations/ breathing, drowsiness, nausea, vomiting, dizziness, constipation, rash, itching, dry mouth and decreased appetite.

Activity

You may also receive muscle relaxants to help with muscle spasms. Common side effects associated with muscle relaxants include drowsiness, headache, confusion, dizziness, nausea and vomiting.

Activity

After your surgery, you may be evaluated by our Physical Therapy Department. They will focus on safe movements and keeping you as active as possible within the limits of your surgery. This team will teach you how to:

- Log roll in bed
- Sit on the edge of the bed
- Walk from the bed to the chair
- Walk in the hallway
- Climb stairs

Our nursing team will teach you how to:

- Dress yourself
- Shower
- Complete activities of daily living (combing your hair or brushing your teeth)
- Toileting

*Please do not attempt to get out of bed by yourself. After spine surgery, you have a greater risk of falling. If you would like to get out of your bed, please call your nurse.

Physical therapy

Equipment

Your surgeon may require you to wear a brace after your surgery. Typically, this brace is provided to you while you are in the hospital. Before you are discharged home, our physical therapists will ensure you are comfortable with putting your brace on/taking it off and how to keep it clean at home. It is important to wear your brace exactly as ordered by your surgeon.

If your surgeon has not ordered a brace for you or if you have a soft collar:

- You may gently move your neck in all directions slowly to the limits of your pain tolerance.
- Do not force the motion in your neck.
- If you have a soft collar, wear your collar as you prefer for comfort.
- Avoid heavy lifting (>10 lbs.).

If your surgeon has ordered a hard collar:

- Wear your collar at all times, except for showering.
- Follow the following precautions (No **BLT**):
 - No Bending of the neck
 - No Lifting >10 lbs.
 - No Twisting of the neck

Physical therapy

Getting in and out of bed

The log roll is the safest way to get yourself in and out of bed.

Getting out of bed

Step 1: While lying on your back, bend your knees. Roll onto your side, keeping your hips and shoulders together as one unit.

Step 2: Place your bottom hand underneath your shoulder and your top hand on the bed at chest level.

Step 3: Push up to sitting position while slowly lowering your legs to the floor.

Getting into bed

Step 1: Sit on the side of the bed and scoot back as far as you can.

Step 2: Slowly lower yourself onto your side, using your arms to help guide and control you. At the same time, lift your legs onto the bed.

Step 3: Keeping your shoulders and hips aligned, turn onto your back as one unit.

Exercises

Shoulder shrugs

Raise and lower shoulders using a circular motion. Perform one set of 10 reps twice a day.

Scapular retraction

Pinch your shoulder blades together. Do not shrug your shoulders. Perform one set of 10 reps (hold for five seconds) two times a day.

Horizontal shoulder stretch

Place one arm across your chest with your opposite hand on the elbow; pull your arm across your chest. Perform one set of 10 reps (hold for 30 seconds) twice a day.

Walking

Walk as much as you wish, up to 1 - 2 miles per day. Remember to take short, frequent walks throughout the day.

Recognizing and preventing complications

Recognizing and preventing complications

Complication	Signs and symptoms	What do I do?	Prevention
Blood clot in your leg (deep vein thrombosis, DVT)	<p>(Signs and symptoms are usually located in the calf of either leg)</p> <ul style="list-style-type: none"> • Swelling • Warmth/redness • Pain 	Call your surgeon.	<ul style="list-style-type: none"> • Short, frequent walks during the day • Rest with your legs elevated
Blood clot in your lungs (pulmonary embolism, PE)	<ul style="list-style-type: none"> • Shortness of breath • Coughing • Chest pain or chest pain with deep breaths • Rapid heartbeat 	Call 911 or go to the emergency room.	<ul style="list-style-type: none"> • Short, frequent walks • Rest with your legs elevated
Infection	<ul style="list-style-type: none"> • Temperature >101.5 F *It is common to run a low-grade temperature (<101.5 F) after surgery • Bright red color around your incision • Increased pain or swelling around your incision • Drainage from your incision site 	Call your surgeon.	<ul style="list-style-type: none"> • Keep your incision clean. • Follow your surgeon's instructions regarding care of your dressing. • Keep pets away from your incision.
Constipation	<ul style="list-style-type: none"> • Having fewer than three bowel movements in one week • Straining to have a bowel movement • Stools that are hard, dry or larger than normal • Pain in the lower abdomen 	Call your surgeon or primary care physician.	<ul style="list-style-type: none"> • Drink lots of fluid. • Eat high fiber foods (fruits, vegetables, whole grains). • Walk frequently. • Take constipation medication as ordered by your surgeon.
Postoperative bleeding (hematoma)	<ul style="list-style-type: none"> • Difficulty breathing • Inability to swallow • Any rapid, expansive swelling in the area of the surgical site 	Call 911 or go to the emergency room.	

Returning home

When you meet discharge criteria, your surgeon will discharge you from the hospital. Most patients will be discharged home, but if you need help getting stronger before going home safely or if you have a medical condition that requires further care, you may be transferred to:

- Inpatient rehab facility
- Skilled nursing facility
- Home healthcare

This decision is made between you, your surgeon and your social worker. For further questions regarding care at home, please call a member of our social work team.

Remember:

- It is normal to feel anxious about returning home after spine surgery. It is OK to ask your support person, family or friends for help.
- Stay active! Continue the exercises that were taught to you while in the hospital and walk frequently during the day.
- Follow any restrictions given to you by your surgeon.
- Keep an eye on your food and fluid intake. Remember to drink plenty of fluids and eat a well-balanced diet.
- Be aware of constipation. This is a common side effect of your pain medication and can cause many problems. Increase fiber and fluids in your diet.

Goals for going home:

- Communicate an understanding of spinal precautions and positioning in bed
- Get in and out of bed without assistance
- Walk without assistance (with the aid of an assistive device if needed)
- Move from the bed to a chair and walk to the bathroom (with the aid of an assistive device if needed)
- Climb and descend curbs/stairs with the aid of an assistive device and supervision
- Be able to dress yourself with supervision or with minimal assistance from family
- Be able to perform your bathing and toileting with supervision or minimal assistance from family

*Goals may change based on individual patient needs.

Final thoughts

For any questions regarding this material, please call [214.407.5168](tel:214.407.5168) to speak with our spine coordinator. Again, we thank you for your dedication to preparing for your surgery. We look forward to meeting you soon!

Fees and medical insurance

Your facility bill may include charges for services provided in various departments. Our facility accepts most major commercial insurance as well as Medicare and Medicaid.

Our business office will verify your insurance benefits, obtain authorization from your insurance company, and calculate your financial responsibility based on your insurance plan. Our facility collects payments for deductibles, copayments and your out-of-pocket expenses before arrival or at patient registration. If upon review your deductible has been fulfilled, you will be issued a refund. Many insurance companies require pre-authorization for surgery.

Online payment is available after your surgery on our website at BSWHealth.com/Frisco.

Professional services are billed separately, including your surgeon, physician, anesthesiologist, laboratory, facility, and radiology or imaging.

If you have any questions regarding fees or insurance, please feel free to call our business office directly. In certain circumstances, payment plans can be arranged through our third-party lender CareCredit. Please speak with a financial specialist before admission by calling [214.407.5359](tel:214.407.5359).

Please be sure to bring your ID, insurance card(s) and all medicine bottles to the hospital on the day of surgery.

Our mission

To provide the opportunity to every individual within Frisco and the surrounding communities the highest standard of healthcare services, designed with excellence, delivered with dignity and demonstrated with respect to those we serve.
